

STRAIGHT DROP BLINDS

PART OF THE *Slidetrack*[®] **FAMILY**
OUTDOOR BLINDS by **OZROLL**

TRANSFORM YOUR OUTDOOR AREA...

A functional, sleek, tight and attractive looking blind which can transform an area into an outdoor living space, and then be rolled up effectively hidden from sight.

Featuring a full range of exciting UV stabilised premium coloured fabrics in 94% or 99% blockout, Slidetrack Straight Drop (SD) blinds are both strong and versatile and can be used to enclose carports, verandahs, pergolas and patio areas. Control your outdoor environment. Keep the heat out in summer and create a barrier to the elements in winter.

STRENGTH AND VERSATILITY...

The Fabric is rolled around an anodised aluminium top tube and comes fitted with a heavy duty commercial grade powder coated aluminium bottom rail.

Slidetrack SD blinds can span up to 5,500mm in width and up to 3,000mm vertical drop which covers almost every application. They can be fitted neatly alongside each other to cover huge outdoor areas without inconvenient and expensive side fixings or posts between each blind.

APPLICATIONS ARE LIMITLESS...

The blinds are fitted in a unique Smoothline headbox, made of strong extruded aluminium & metal ends, powder coated in a range of popular standard colours to match your home.

The fabric simply rolls down across the opening and the bottom rail is fixed to anchor points on the wall, floor or posts. A gear box operates the blind which is wound up to tension the fabric using a crank handle.

Stainless steel fittings are used for the lower fixing mounts which also include adjusters that enable the blind to be evenly tensioned after installation.

...when Function meets Form
